

# ESE 8 Dual Tip Suction Excavator

26T

## FOR POWER AND VERSITILITY

Introducing our ESE 8 suction excavator, built versatility in mind, with dual tip capability. Ideal for works requiring flexible tipping options.

- Remote drive
- High speed twin fans
- Dual tip capability
- Height & slew restrictor
- High pressure water
- High pressure air

### KEY CAPABILITIES

Excavate from a distance of 30 metres

Excavate vertically from 0-10 metres

### ALL ROUND CAPABILITY

Our twin fan units can be used for 'standard' suction excavation work or with extension hoses for short distances. These units are designed to be compact, making them ideal for worksites where space is limited. Additionally, their rear steer configuration makes them maneuverable in tight spaces.
